ABOUT ME

Passionate Frontend Developer and Virtual Assistant. I build responsive, modern websites using HTML5, CSS3, and JavaScript. Additionally, I provide high-quality Virtual Assistant services including Data Entry, Lead Generation, Email Management, and Market Research to help businesses run smoothly.

FEATURED PROJECTS

Taste in Orbit Restaurant Website

HTML5 / CSS3

Frontend Web Project

Designed and developed a fully responsive, visually compelling landing page for a modern dining restaurant.

- Implemented clean modern UI components and fluid layout for mobile and desktop screens.
- Optimized cross-browser compatibility and page loading performance.

SKYLINE Dubai Property Website

Real Estate UI

Premium Real Estate Listing Site

Created a high-end luxury property listing platform interface customized for Dubai's real estate market.

- Designed structured property showcase layouts, elegant typography, and interactive sections.
- Focused on sleek, user-centric navigation to enhance client engagement.

VIRTUAL ASSISTANCE SERVICES

- Lead Generation & Prospecting:** Targeted web research and data gathering to compile verified client leads.
- Data Management:** Efficient Data Entry and organization using Google Sheets and Excel with high accuracy.
- Email & Admin Support:** Professional email handling, schedule management, and administrative assistance.
- Graphic Support:** Quick visual asset creation using Canva for corporate presentations and social posts.
